

ASWIN P

Software Developer

+91 9539436250 | aswinp.clt2002@gmail.com | github.com/aswinpclt | linkedin.com/in/aswin-p-ba8b01421

SUMMARY

Software Developer with hands-on experience building full-stack, AI-integrated web applications using Python, Django, and JavaScript. Skilled in REST API design, cloud deployment (AWS EC2/S3), and containerized workflows with Docker and CI/CD pipelines. Comfortable working across the stack — from database design to responsive front-end interfaces — with a track record of shipping complete, working projects independently.

TECHNICAL SKILLS

- Languages: Python, JavaScript, SQL, HTML5, CSS3, C, Java
- Backend: Django, Django REST Framework, Node.js, Express.js, REST APIs, Authentication & Authorization, CRUD Operations
- Frontend: React.js, Bootstrap, Tailwind CSS, Framer Motion, Responsive Web Design
- Cloud & DevOps: AWS (EC2, S3, IAM), Docker, CI/CD (GitHub Actions), Vercel, Linux, Nginx
- Databases: SQLite, MySQL, MongoDB, Firebase Realtime DB
- AI & ML: Generative AI Integration, Prompt Engineering, Machine Learning, Computer Vision (OpenCV, MediaPipe)
- Tools: Git, GitHub, VS Code, Postman

EXPERIENCE

AWS Cloud & DevOps Intern — ICT Academy of Kerala Aug 2025 – Sep 2025

- Completed a one-month AWS Cloud and DevOps internship, deploying applications on EC2 and S3.
- Worked hands-on with cloud infrastructure, Linux server environments, and application deployment workflows.

Python Full Stack Developer Trainee — Indian Service Machine (ISM) Jul 2023 – Dec 2023

- Completed intensive full-stack development training, building 20+ projects covering frontend-backend integration and web automation.
- Gained hands-on experience with relational database management and dynamic, data-driven web applications.

PROJECTS

AI Insurance Policy Analysis System (InsureAI)

Python, Django, Machine Learning, Generative AI, SQLite, JavaScript, Bootstrap

- Built a full-stack platform that uses generative AI to summarize insurance policy documents and answer coverage questions in plain language.
- Implemented a machine learning model for premium prediction and a recommendation engine for personalized coverage suggestions.
- Developed secure user authentication, PDF upload and parsing, a policy management dashboard, and automated email reminders.
- Designed RESTful APIs to connect the Django backend with a responsive JavaScript/Bootstrap frontend.

AI Virtual Steering Wheel

Python, OpenCV, MediaPipe, NumPy, Pynput, Computer Vision

- Built a real-time computer vision system that translates hand gestures into keyboard inputs for driving simulation games.
- Used MediaPipe for hand landmark detection and OpenCV for live webcam processing, tracking both hands simultaneously.
- Designed the steering angle calculation logic that maps hand position to gesture-based keyboard control with low latency.

Personal Portfolio Website

HTML5, CSS3, JavaScript

- Designed and built a responsive portfolio site showcasing projects, skills, and professional profile links.
- Built a clean, mobile-friendly interface with intuitive navigation, optimized for consistent rendering across devices.

EDUCATION

Master of Computer Applications (MCA) — CCSIT Vadakara, University of Calicut 2024 – Present

Bachelor of Computer Applications (BCA) — SNES College of Arts, Commerce and Management, Kunnamangalam 2019 – 2022

CERTIFICATIONS

- AWS Certified Cloud Practitioner
- Python Full Stack Development Training — Selfstack, Calicut
- Languages: English, Malayalam
- Strengths: Problem solving, analytical thinking, and clear technical communication in cross-functional teams
